

Data Flow Diagram

Date	29 September 2026
Team ID	SWTID-2026-6777
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

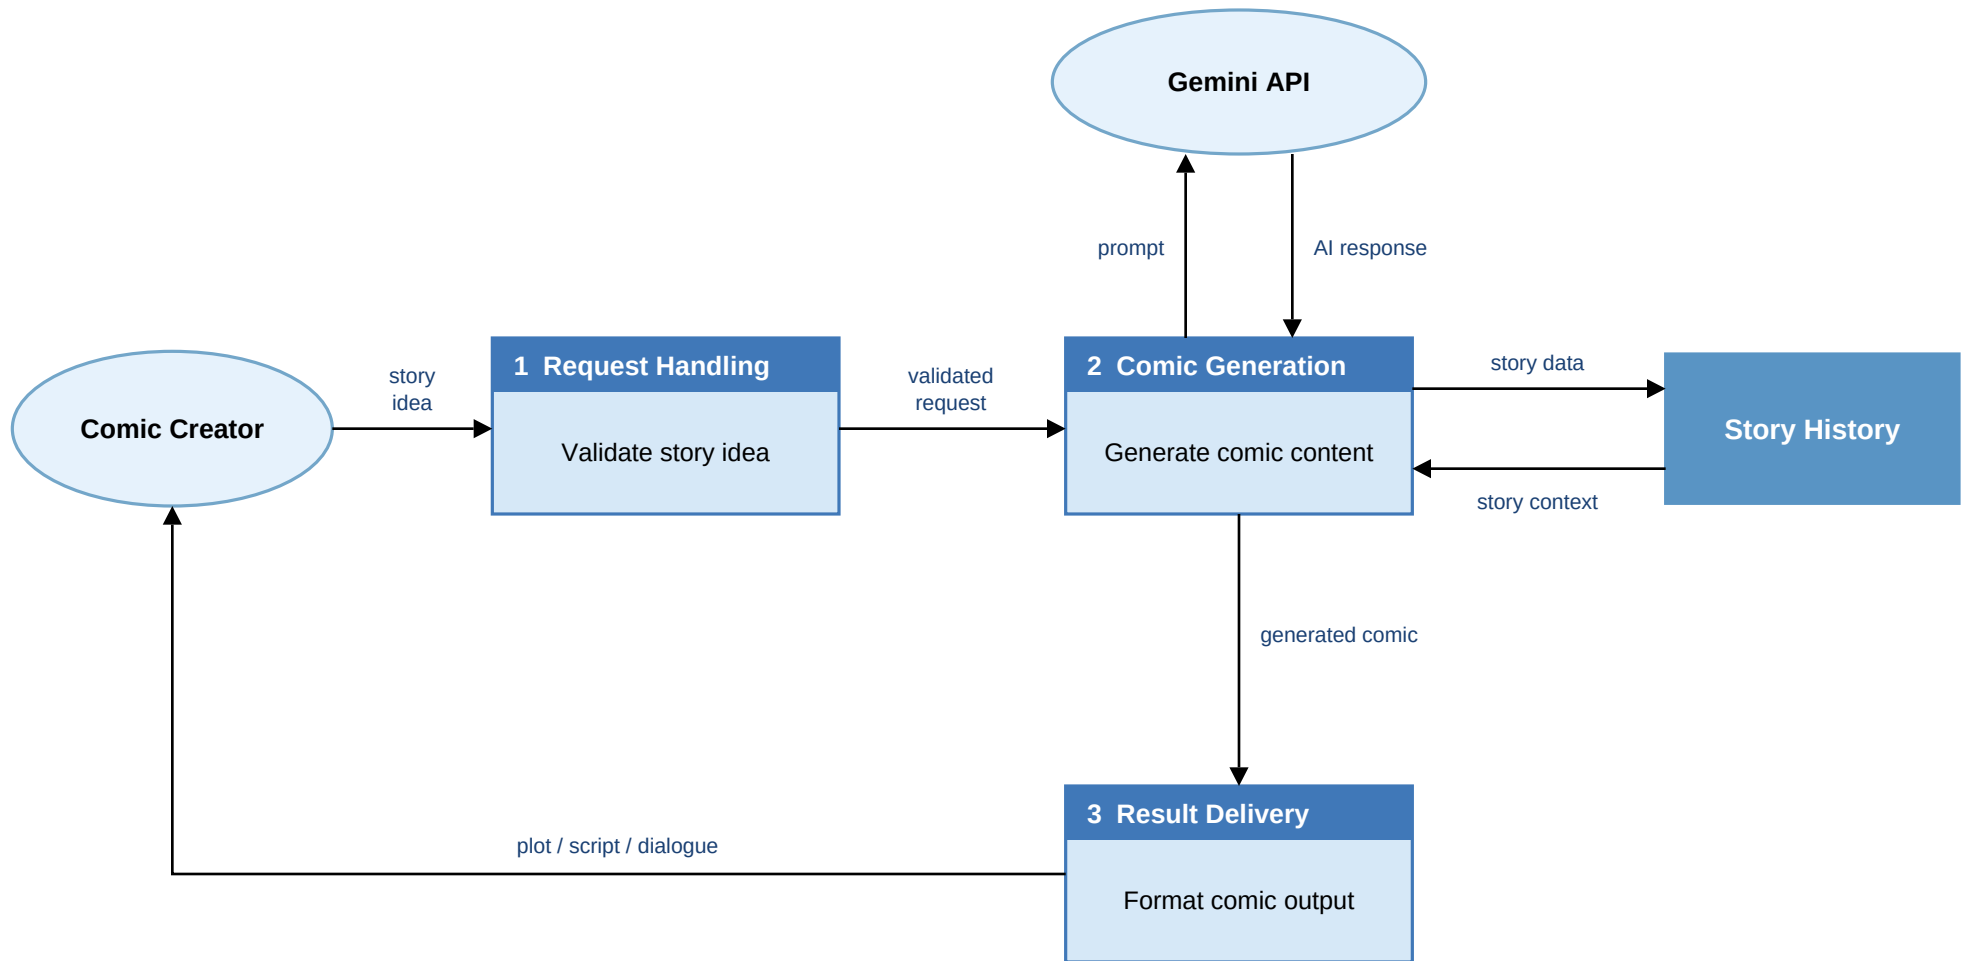

Symbol	Name	Description
Oval / Rounded shape	External Entity	Person, organization, or system outside the project.
Rectangle with numbered header	Process	Activity that transforms incoming data into outgoing data.
Rectangle solid fill, no number	Data Store	Place where data is held for later use.
Labeled arrow	Data Flow	Movement of data between entities, processes, and stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

ComicCraft Data Flow Diagram

The creator's story idea is received by FastAPI, sent to Gemini to generate the comic content, and returned to the web interface.

Flow: Comic Creator -> Request Handling -> Comic Generation -> Result Delivery -> Comic Creator

Gemini API generates the plot, characters, panel scripts, and dialogue for each comic story.

Story History stores application context used to support subsequent story requests.
